FOREWORD

THE KEYSTONE of astrological interpretation is a thorough knowledge of rulerships or correspondences. In the symbolic language of Astrology, the planets, signs, and houses are said to "rule" over everything on earth and every facet of our lives. This book presents a practical list of these correspondences, conveniently arranged alphabetically as well as by signs, houses, and planets. Rulerships are included for all branches of Astrology, including natal, mundane, and horary. The inclusion of anatomical items and diseases will be particularly helpful for medical interpretations. Space has been left throughout the book for additional entries by the reader.

These rulerships are taken from the writings of many of the world's greatest astrologers. Items in parentheses were given by fewer astrologers, sometimes by only one, and should be considered as merely tentative. Many entries show only a single rulership, such as a planet. This does not mean that these are not connected to a sign or house as well, but that the ruler listed is of primary importance. To find the secondary rulers for these items, use the following table:

☉ — ♌ — 5
☽ — ♋ — 4
☿ — ♊, ♍ — 3, 6
♀ — ♉, ♎ — 2, 7
♂ — ♈ (♏) — 1 (8)
♃ — ♐ (♓) — 9 (12)
♄ — ♑ (♒) — 10
♅ — ♒ — 11
♆ — ♓ — 12
♇ — ♏ — 8

When a choice of signs or houses is necessary (such as ♉ and ♎ for ☿) consider what nature of the planet is being expressed. Money, for example,

is a facet of ♀ that is expressed through ♉ and the 2nd house, while art is expressed through ♎ and the 7th house.

In some cases an item will be ruled by more than one planet, sign, or house. This usually means that several viewpoints must be considered and the rulership chosen should be related to the facet in which the person is interested. For example, cemeteries are ruled by both ♄ and ♇. ♄ is associated with cemeteries because of the land involved, while ♇ is associated with matters of death. If cemeteries are of interest more as a place or a piece of land than as a place to bury the dead, then ♄ should be considered the ruler.

Everything, in reality, is ruled by everything else, just as the natal horoscope shows influences from all the signs, houses, and planets, and as all things are one with the universe. But everything does not have an equally powerful influence. This book is concerned only with major rulerships. It is quite possible to find a reason why every planet, sign, and house can rule an object. Sculpture, for example, is normally ruled by ♀, because of its artistic nature. However, the stone of which it is carved comes under the dominion of ♄. The technique of carving is ruled by ♂. If it is a statue of a famous person (☉), an antique statue (♅), a tiny statue of delicate detail (☿), or of a woman with child (☽), or part of a fountain (♆) or a tomb (♇), it comes under the dominion of each of the planets in turn. Therefore, do not hesitate to choose a rulership which is not listed if it seems to fit your particular needs.

Each planet, sign, or house expresses both a desirable and an undesirable side. The same ☿ rules both intelligent thought and worry, and the same 7th house rules both unions and separations. The aspects affecting each planet and the location of the planet in the chart will indicate which side is expressing.

It is important to note that rulerships can change. This does not mean that energies are changing, but that man is changing in his response to the energies. There is wide disagreement on many rulerships. Specific stones, colors, trees, herbs, etc. are especially contradictory in opinion. Geographical rulerships are also suspect as well as incomplete and due for much new research. Some astrologers divide the world into twelve regions and assign each region a sign rulership. One such theory has Aries ruling 15 degrees on either side of the Greenwich meridian, Taurus the next 30 degrees east, etc. Geographical rulerships of this type are generally omitted from this book. A correct rulership is best obtained from the "birth chart" of a city or country or by close observation over a long period of time. Much of this information is either not available or not accessible. Many lists of rulerships have simply been copied countless times since they were first determined by ancient astrologers.

Serious, up-to-date research is vitally needed. One of the major objectives of this book is to prompt such research and to gather together the unpublished findings of serious astrologers. It is hoped that new information will be sent to the author, so that it can be incorporated in future editions. It is recognized that in spite of years of careful compilation, errors and omissions will be found in this work; the author would appreciate hearing of these also. Communications may be sent to Rex E. Bills, c/o Macoy Publishing and Masonic Supply Co., Inc., 3011 Dumbarton Road, Richmond, Virginia 23228.

Note that most items are given in their plural form. This sometimes affects their location in the alphabetical listing.

Anyone who works with this book will find that it will become one of his most valuable reference books. A careful study of its pages will give a deeper insight into the nature of each sign, planet, and house than can be gained by general descriptions normally given in Astrology books. As one becomes more and more efficient at horoscope delineation, he turns away from other astrologers' descriptions of planets in signs and planets in houses and begins to blend the factors himself. The rulerships and keywords contained in this book are excellent guidelines for the intuition. By blending the rulerships listed under a planet with a sign and a house, an extensive delineation can be given. By then blending this with the harmony or disharmony of an aspect and another planet, sign, and house, the puzzle pieces begin to fall in place; and the student is on his way toward being a competent *independent* astrologer.

INTRODUCTION

by Diana Bills Stone

Venus-of-pleasure transits Jupiter-of-publishing and is in trine aspect to Mercury-of-writing. The English translation for that bit of "rulership jargon" is that I am pleased to write the Introduction to the new AFA edition of *The Rulership Book*. I was married to Rex Bills when he wrote this book in 1969 and 1970. I had sympathy pains throughout the two-year pregnancy and birth. I want to share some memories and history which I think reveals the soul of the book.

When Rex wrote this book, I was a neophyte in the early years of my astrological studies. We were living in St. Louis with our young son. During this time, we parked him on the farm with Grandma and traveled to Disneyland for our vacation. Those of you who have visited Disneyland are aware that it is often necessary to stand in line for favorite rides. As we waited in line for the "It's a Small, Small World" ride, Rex made notes for rulerships and I read a Marc Edmond Jones book. To waste a few minutes when we could be doing astrology was a sacrilege in those days! So it was with Rex and his labor of love.

In the sixties when Rex and I began our studies, there were no computers to calculate charts. Nor were there atlases listing geographical longitudes, latitudes and time changes; the Dark Ages, in other words. Whenever a rulership question came up, we were sent pawing through stacks of books and lists. To forestall duplication of effort, we began to record our findings in a three-ring notebook with alphabetical sections. The rulership notebook grew fatter and fatter. One notebook expanded to several. Word spread through our community of astrological friends that we were a reference source for rulerships.

An astrologer friend suggested that the burgeoning notebooks be compiled between book covers. At first, we thought it would be a simple matter to translate our references into book form. Then one thing led to another as Rex searched out additional reference books to make the lists more complete. I think he harbored a fantasy that the book could list rulerships for every word in the dictionary. Just where does one draw the line on a project like this? It became a deadly

kind of joke between us. About the time Rex would decide an end was in sight, I would innocently muse on the rulerships of the scarlet tanager, every capitol city in the United States or artichokes.

Sometimes word of a long out-of-print book would reach us and set off a frenzied search. Dr. Cornell's *An Encyclopedia of Medical Astrology* has since been reprinted, but back then it was very hard to locate a copy and also very expensive once one did. We were obsessed with finding it because it was the definitive source for medical rulerships. We finally located a copy at the local Theosophical Society library. Charles Luntz, our teacher and author of *Vocational Guidance by Astrology*, was president of the Theosophical Society and gave us permission to borrow it. When his sudden death plunged the Theosophical society into utter chaos and his library was being plundered, we safely harbored the book and studied its contents.

Rex wrapped up the project, distilling the many notebooks into one usable reference work, and sent it to the publisher with a profound sense of relief. Rex was then a technical representative for Eastman Kodak Company, so he had to work the book project around a full-time job. Rex is an Aries sun sign and he doesn't just start a project; he mounts a full-scale invasion. He was up at 5:00 AM every day to work on the book, and came home evenings only to eat and plunge into his writing until bedtime. You have heard of lost weekends: He vanished every Friday not to be seen until Monday morning. Feeling mentally burned out after this intense effort he turned to other interests, and ironically never seriously studied astrology again!

I never will forget the day the letter came from the editors listing other books they wanted researched and the rulerships added to the manuscript. Rex went into total rebellion. He was too mind-weary to consider it and threatened to burn the entire thing in the fireplace. Reason eventually prevailed and the additional work was completed to the satisfaction of the publisher. The little project we had first envisioned dominated Rex's every spare minute over two years. Even though the finished product fell short of Rex's vision of rulerships for the entire dictionary, I feel that *The Rulership Book* was an enormous contribution toward stabilizing astrological practice.

It was fascinating to see what happened to Rex's consciousness as he immersed himself in the research for the book. I was studying astrology in the way traditional for the majority of students; reading and attending lectures and conferences when I could. And doing lots of charts. Rex abandoned that route and concentrated totally on rulerships. After several months he began to know the rulership of things without looking them up. He began to comment on the deep, intuitive understanding of astrological symbolism that was developing. I could see the process that was happening for Rex and many times envied his experience. The appointments of the rulerships are not arbitrary, but a deep and logical system of knowledge flows through them and forms them into one great whole.

Now here it is some twenty years later. What experiences I have had with astrology and *The Rulership Book* since then! I am on my third copy, and even that one is getting pretty dog-eared. Astrology certainly needs a dictionary of astrological correspondences. *The Rulership Book* is a standard reference text that deserves a home in any astrological library. However, it has been an indispensable tool for horary and electional work.

Gilbert Navarro of Baltimore, Maryland, is a close friend and colleague of mine. He is a top-flight horary practitioner and teacher, a protege of Ivy-Goldstein-Jacobson. Gilbert has written a correspondence course for horary astrology and I am the tutor of the West Coast students. *The Rulership Book* is a required text for the course.

The concept of derivative houses is fundamental to horary astrology. Derivative houses are where the rules originate, for example, that the eighth house represents the partner's money. Partners are ruled by the seventh house, their first house. The eighth house is the partner's second house of money. Count the seventh house as the partner's first house and go forward to his or her fifth house and that is the eleventh house of the wheel. The eleventh house reflects a partner's fifth house matters. Sometimes eleventh house transits will indicate a stepchild entering the life (partner's children).

I appreciate the derivative house relationships included in *The Rulership Book*. For example, I may know that my brother's children's children are his grandchildren ruled by

my eleventh house by doing some counting on fingers. It is much simpler, though, to consult *The Rulership Book* than to play ring-around-the-rosy with the zodiac.

Electional astrology is used when the astrologer constructs a chart for propitious times to conduct various activities. Choosing a good time for a marriage or for surgery are two examples. I have set charts for taking trips, opening businesses, making real estate purchases, firing employees, asking for a raise, and inviting a hunk to dinner. Rulerships are absolutely critical to election charts. What would a poor single woman do if her astrologer thought a Venus-Uranus conjunction was a good time for her tete-a-tete? When I want to set up an election chart, I reach for the ephemeris and *The Rulership Book*. It's standard operating procedure.

I have a very special use for *The Rulership Book*. That is for a type of chart I use in my practice and have named "Current Cycle Charts." These are charts cast for appointment times. If my client has a consultation scheduled for Wednesday at 3:00 PM, I cast a chart for that time. There is not space to discuss how to interpret these charts except to say that horary rules are used primarily. These charts have been profoundly useful in my work with clients. The point I want to make, however, is this. *The Rulership Book* has been a constant companion to the interpretation of current cycle charts. For example, the Ascendant of the chart and what it rules will tell me the most important issues in the client's life at the time. As you know, any one sign rules a lot of things. How to select which is the correct rulership seems impossible. Many times I have sat at my desk staring at the natal chart and current cycle chart and perusing *The Rulership Book*. Different rulerships begin to "pop out" and make sense with other indicators I use in reading these charts. It really sharpens the intuitive sense.

Astrologers sometimes ask me why Rex is never seen at astrology conferences or even if he is still alive. The truth is that Rex's destiny seems to be bound only with *The Rulership Book* as far as astrology is concerned. He is true to his Aries sign, having gone on to a variety of other successful and interesting projects.
